508 Topics: Captioning

Friday, October 5

The DECT grant makes it easy to get your course videos professionally captioned for free. But what about when there's a time crunch and you have to caption last-minute videos on your own? How do you go about creating the captions? What kind of non-speech sounds need to be captioned (i.e., a telephone ringing, a dog barking, background music)? What if turning on the captions covers up an important part of your video? How would you caption a video for a visually-impaired student? Come find out the answers to these questions and more!
