Not to know is bad. Not to want to know is worse. Not to hope is unthinkable. Not to dare is unforgivable.

1. Course Description
The History of Modern Civilization is a survey of the political, economic and social development of modern world civilizations from the rise of the West in the mid-fifteenth century to the advent of the global age in the present day. Part one deals with the rise and expansion of the West in the early modern period, increasing global trade and contacts, and the formation of new empires. Part two examines the political development and industrialization of the West and its consequences; the development and global impact of nationalism and imperialism; and the establishment of Western global hegemony. Part three concerns the twentieth century with an analysis of international conflicts, resolved and unresolved; state building; the decline of western dominance; and the evolution of global relations. The course concludes with an evaluation of the challenges confronting us as we enter the 21st century.

2. Course Overview
The purpose of this course is to assist you in acquiring the resources and analytical skills necessary to better understand, appreciate and evaluate the development of world civilizations and their impact in shaping contemporary life. Class materials include lectures, presentations, videos and assigned readings that will provide you with a basic framework of information. We will analyze these secondary sources as well as primary sources such as documents and cultural artifacts through class and group discussion and the writing of essay exams. In examining the past we will strive to identify and understand the broad patterns of human behavior and experience that comprise world history.
