Proposal for Course Revisions
Fall 2018

Subject and Number: Engineering 9
Descriptive Title: Engineering Mechanics - Statics
Course Discipline(s): Engineering
Division: Mathematical Sciences
Department: Engineering
Faculty Proposer: Jill Evensizer
Division CCC Rep: Diaa Eldanaf

Division Curriculum Committee Approval Date: 09/26/18

Course Review Rationale (The standard rationale verbiage is included. Add additional rationale information if needed): This course is being reviewed to meet Title 5 regulations and local standards. Add additional justification as needed: This course is being reviewed to meet Title 5 regulations and local standards.

☐ Inactivation
Justification:
(If this course is being inactivated, stop here. No other parts of the form need to be complete.)

I. Course Name and Number
☒ No changes
☐ Revisions
Justification:

IX. Distance Education Addendum
If a Distance Education Addendum exists for this course, you must complete the Distance Education Addendum below. Please refer to CurricUNET version if needed.

Distance Education Version of this Course
Current version ☐ Online ☐ Hybrid
☐ No Changes
☐ Revisions
Justification:

Delivery Method:
☐ Online (Complete Section A)
☐ Hybrid (Complete Section B)

A. Online (51% or more online instruction with an optional or mandatory on-campus orientation.)
Complete this section.

I. Methods of Regular Effective Contact Between Instructor and Student (Check all that apply)
A. Group Meetings:
☐ Chat Room
☐ Interactive Videoconferencing
☐ Teleconference
☐ On Campus
☐ Other (Please specify)

B. Electronic/Technology-Assisted Contact
☐ Online
☐ Email
☐ Listserv
☐ Chat Room
☐ Interactive Videoconferencing
☐ Website/Bulletin Board
☐ Telephone
☐ U.S. Mail
☐ On Campus
☐ Other (Please specify)

C. Office Hours
☐ Online
☐ On Campus

II. Methods of Evaluation
☐ Methods of Evaluation do NOT differ from those in the Course Outline of Record
☐ Methods of Evaluation in the Course Outline of Record are modified or supplemented
III. **Administration of Examinations**

- ☐ On Campus
- ☐ Online
- ☐ Email
- ☐ U.S. Mail
- ☐ Proctored Off Campus
- ☐ Not applicable
- ☐ Other (Please specify)

IV. **Text/Supplemental Readings/Materials**

- ☐ Texts, Supplemental Readings, and Materials do NOT differ from those listed in the Course Outline of Record
- ☐ Texts, Supplemental Readings, and Materials differ from those listed in the Course Outline of Record

V. **Accommodations for Students with Disabilities and Instructional Delivery**

In compliance with ECC Board Policies 1600 and 3410, Title 5 California Code of Regulations, the Rehabilitation Act of 1973 – Sections 504 and 508, and the Americans with Disabilities Act, instructional delivery shall provide access, full inclusion, and effective communication for students with disabilities. Instructional delivery methods may include, but are not limited to, Braille/audiotape for print material, on-site interpreter/real-time transcription/live captioning for audio material, captioning for video material, alternative text for images, and captioning of audio information for electronic media materials (such as web and online).

- ☐ Instructors of the distance education version of this course will read and will comply with the Accommodations for Students with Disabilities and Instructional Deliver.

B. **Hybrid** (51% of more online instruction with regularly scheduled mandatory on-campus meetings.)

**Complete this section.**

V. Accommodations for Students with Disabilities and Instructional Delivery
In compliance with ECC Board Policies 1600 and 3410, Title 5 California Code of Regulations, the Rehabilitation Act of 1973 – Sections 504 and 508, and the Americans with Disabilities Act, instructional delivery shall provide access, full inclusion, and effective communication for students with disabilities. Instructional delivery methods may include, but are not limited to, Braille/audiotape for print material, on-site interpreter/real-time transcription/live captioning for audio material, captioning for video material, alternative text for images, and captioning of audio information for electronic media materials (such as web and online).

☐ Instructors of the distance education version of this course will read and will comply with the Accommodations for Students with Disabilities and Instructional Delivery.
El Camino College
COURSE OUTLINE OF RECORD - Official

I. GENERAL COURSE INFORMATION

Subject and Number: Engineering 9
Descriptive Title: Engineering Mechanics - Statics
Course Disciplines: Engineering
Division: Mathematical Sciences

Catalog Description:
In this course, students will explore resultants and components of concurrent forces; moments of forces with respect to points and axes; equivalent systems of forces and moments; equilibria of particles and rigid bodies in two and three dimensions; distributed forces; centroids and centers of gravity; analysis of structures; forces in beams; friction moments and products of inertia; and energy methods.

Conditions of Enrollment:

Prerequisite: Physics 1A AND Mathematics 191 with a minimum grade of C

Course Length: X Full Term  Other (Specify number of weeks):

Hours Lecture: 3.00 hours per week  TBA
Hours Laboratory: 0 hours per week  TBA
Course Units: 3.00

Grading Method: Letter
Credit Status: Associate Degree Credit

Transfer CSU: X  Effective Date: 1/20/1998
Transfer UC: X  Effective Date: Fall 1998

Office Use Only: Course Identifier 17791
II. OUTCOMES AND OBJECTIVES

A. COURSE STUDENT LEARNING OUTCOMES (The course student learning outcomes are listed below, along with a representative assessment method for each. Student learning outcomes are not subject to review, revision or approval by the College Curriculum Committee)

   Solve equilibrium problems in two and three dimensions using algebraic and trigonometric methods.

The above SLOs were the most recent available SLOs at the time of course review. For the most current SLO statements, visit the El Camino College SLO webpage at [http://www.elcamino.edu/academics/slo/](http://www.elcamino.edu/academics/slo/).

B. Course Student Learning Objectives (The major learning objective for students enrolled in this course are listed below, along with a representative assessment method for each)

1. Apply the parallelogram law in the addition and subtraction of concurrent forces.
   
   **Objective Exams**

2. Solve equilibrium problems in two and three dimensions using algebraic and trigonometric methods.
   
   **Objective Exams**

3. Apply the basics of vector algebra to solve equilibrium problems in two and three dimensions.
   
   **Objective Exams**

4. Convert a system of forces and moments to an equivalent system at another point of a body.
   
   **Objective Exams**

5. Determine the resultants of distributed forces and centers of gravity.
   
   **Objective Exams**

6. Analyze forces which occur in structures and trusses where joints are held together by pins.
   
   **Objective Exams**

7. Determine distributed forces, shear forces, and moments in beams; draw diagrams of distributed forces, shear forces, and moments.
   
   **Objective Exams**

8. Solve statics problems involving friction.
   
   **Objective Exams**

   
   **Objective Exams**

*Office Use Only: Course Identifier 17791*
III. OUTLINE OF SUBJECT MATTER (Topics are detailed enough to enable a qualified instructor to determine the major areas that should be covered as well as ensure consistency from instructor to instructor and semester to semester.)

IV. PRIMARY METHOD OF EVALUATION AND SAMPLE ASSIGNMENTS

A. PRIMARY METHOD OF EVALUATION:

Problem solving demonstrations (computational or non-computational)

B. TYPICAL ASSIGNMENT USING PRIMARY METHOD OF EVALUATION:

A 160 kg utility pole is used to support at C the end of an electric wire. The tension in the wire is 540 N, and the wire forms an angle of 15° with the horizontal at C. Determine the largest and smallest allowable tensions in the guy cable BD if the magnitude of the couple at A can not exceed 360 N-m. See the diagram. Show all of your work.
C. COLLEGE-LEVEL CRITICAL THINKING ASSIGNMENTS:

0. Three loads are applied to a beam as shown. The beam is supported by a roller at A and by a pin at B. Neglecting the weight of the beam, determine the reactions at A and B when P = 15 kips. Show all of your work.

1. Using the method of joints, determine the force in each member of the truss shown. State whether each member is in tension or compression. Show all of your work.

D. OTHER TYPICAL ASSESSMENT AND EVALUATION METHODS:

Other exams
Homework Problems

V. INSTRUCTIONAL METHODS

Discussion
Lecture

Note: In compliance with Board Policies 1600 and 3410, Title 5 California Code of Regulations, the Rehabilitation Act of 1973, and Sections 504 and 508 of the Americans with Disabilities Act, instruction delivery shall provide access, full inclusion, and effective communication for students with disabilities.

VI. WORK OUTSIDE OF CLASS

Study
Answer questions
Required reading
Problem solving activities

Estimated Independent Study Hours per Week: 6

VII. TEXTS AND MATERIALS

A. UP-TO-DATE REPRESENTATIVE TEXTBOOKS

B. ALTERNATIVE TEXTBOOKS

C. REQUIRED SUPPLEMENTARY READINGS

D. OTHER REQUIRED MATERIALS

Graphing or scientific calculator

VIII. CONDITIONS OF ENROLLMENT

A. Requisites (Course and Non-Course Prerequisites and Corequisites)
