Proposal for Course Revisions
Fall 2018

Subject and Number: Mathematics 37
Descriptive Title: Basic Algebra and Mathematics
Course Discipline(s): Mathematics
Division: Mathematical Sciences
Department: Mathematics
Faculty Proposer: Lars Kjeseth
Division CCC Rep: Diaa Eldanaf
Division Curriculum Committee Approval Date: 10/13/18

Course Review Rationale (The standard rationale verbiage is included. Add additional rationale information if needed): This course is being reviewed to meet Title 5 regulations and local standards. Add additional justification as needed:

☐ Inactivation
Justification:
(If this course is being inactivated, stop here. No other parts of the form need to be complete.)

I. Course Name and Number
☒ No changes
☐ Revisions
Justification:

Descriptive Title
☒ No Changes
☐ Revisions
Justification:

Catalog Description
☒ No Changes
☐ Revisions
Justification:

Conditions of Enrollment
☒ No Changes
☐ Revisions (If prerequisite changes are being proposed, contact the Curriculum Advisor.)
Justification:
II. Student Learning Outcomes (SLOs)
☒ No Changes
☐ Revisions
Justification:

III. Objectives
☒ No Changes
☐ Revisions
Justification:

IV. Major Topics
☒ No Changes
☐ Revisions
Justification:

V. Primary Methods of Evaluation
☒ No Changes
☐ Revisions
Justification:

VI. Instructional Methods
☒ No Changes
☐ Revisions
Justification:

VII. Work Outside of Class
☒ No Changes
☐ Revisions
Justification:

VIII. TEXTS AND MATERIALS
☐ No Changes
☒ Revisions
Justification: A note was added explaining that there is no textbook for this course and that the “book” listed no more than set of online homework.
IX. Distance Education Addendum
If a Distance Education Addendum exists for this course, you must complete the Distance Education Addendum below. Please refer to CurricUNET version if needed.

Distance Education Version of this Course
Current version ☐ Online ☐ Hybrid
☐ No Changes
☐ Revisions
Justification:

Delivery Method:
☐ Online (Complete Section A)
☐ Hybrid (Complete Section B)

A. Online (51% or more online instruction with an optional or mandatory on-campus orientation.) Complete this section.

I. Methods of Regular Effective Contact Between Instructor and Student (Check all that apply)
A. Group Meetings:
☐ Chat Room
☐ Interactive Videoconferencing
☐ Teleconference
☐ On Campus
☐ Other (Please specify)

B. Electronic/Technology-Assisted Contact
☐ Online
☐ Email
☐ Listserv
☐ Chat Room
☐ Interactive Videoconferencing
☐ Website/Bulletin Board
☐ Telephone
☐ U.S. Mail
☐ On Campus
☐ Other (Please specify)

C. Office Hours
☐ Online
☐ On Campus

II. Methods of Evaluation
☐ Methods of Evaluation do NOT differ from those in the Course Outline of Record
☐ Methods of Evaluation in the Course Outline of Record are modified or supplemented
III. **Administration of Examinations**
- On Campus
- Online
- Email
- U.S. Mail
- Proctored Off Campus
- Not applicable
- Other (Please specify)

IV. **Text/Supplemental Readings/Materials**
- Texts, Supplemental Readings, and Materials do NOT differ from those listed in the Course Outline of Record
- Texts, Supplemental Readings, and Materials differ from those listed in the Course Outline of Record

V. **Accommodations for Students with Disabilities and Instructional Delivery**
In compliance with ECC Board Policies 1600 and 3410, Title 5 California Code of Regulations, the Rehabilitation Act of 1973 – Sections 504 and 508, and the Americans with Disabilities Act, instructional delivery shall provide access, full inclusion, and effective communication for students with disabilities. Instructional delivery methods may include, but are not limited to, Braille/audiotape for print material, on-site interpreter/real-time transcription/live captioning for audio material, captioning for video material, alternative text for images, and captioning of audio information for electronic media materials (such as web and online).

- Instructors of the distance education version of this course will read and will comply with the Accommodations for Students with Disabilities and Instructional Delivery.

B. **Hybrid** (51% of more online instruction with regularly scheduled mandatory on-campus meetings.)
**Complete this section.**

I. **Methods of Regular Effective Contact Between Instructor and Student** (Check all that apply)
A. **Group Meetings:**
   - Chat Room
   - Interactive Videoconferencing
   - Teleconferencing

   ☐ Instructors of the distance education version of this course will read and will comply with the Accommodations for Students with Disabilities and Instructional Delivery.
El Camino College
COURSE OUTLINE OF RECORD - Pending

I. GENERAL COURSE INFORMATION

Subject and Number: Mathematics 37
Descriptive Title: Basic Algebra and Mathematics
Course Disciplines: Mathematics
Division: Mathematical Sciences

Catalog Description:
This elementary algebra course provides students who place below the elementary algebra level the opportunity to develop numeracy skills, strengthen mathematical reasoning skills, and complete elementary algebra in a single semester. There are three levels of mathematics in this course, taught in an integrated fashion: basic arithmetic skills; fundamentals of algebra, with an emphasis on linear equations; and the remaining topics found in a typical elementary algebra course. This course has multiple exit levels, based on a student’s demonstrated competencies. Students engage in student-success activities tailored specifically for mathematics courses.

Note: This course is not recommended for students who place at or above the elementary algebra level.

Conditions of Enrollment:
You have no defined requisites.

Course Length:

☑ Full Term ☐ Other (Specify number of weeks):
Hours Lecture: 4.50 hours per week [TBA
Hours Laboratory: 3.50 hours per week [TBA
Course Units: 5.00

Grading Method: Pass / No Pass
Credit Status: Associate Degree Credit

Transfer CSU: No
Transfer UC: No
II. OUTCOMES AND OBJECTIVES

A. COURSE STUDENT LEARNING OUTCOMES (The course student learning outcomes are listed below, along with a representative assessment method for each. Student learning outcomes are not subject to review, revision or approval by the College Curriculum Committee)

1. SLO #1 Application Problems: A student will be able to recognize the underlying mathematical concepts, with an emphasis on linear relations, in a given context (word problems, data, diagrams, etc.) and apply those concepts correctly.

2. SLO #2 Solving Equations and Manipulating Expressions: A student will be able to demonstrate the ability to identify and correctly implement techniques to symbolically solve equations, with an emphasis on linear equations, and manipulate expressions.

3. SLO #3 Visual and Graphical Methods: A student will be able to use visual and graphical methods to represent and analyze information and to solve problems, with an emphasis on linear graphs.

4. SLO #4 Articulating Mathematical Reasoning: A student will be able to articulate orally or in written form the mathematical reasoning they used to solve a problem or analyze a situation.

The above SLOs were the most recent available SLOs at the time of course review. For the most current SLO statements, visit the El Camino College SLO webpage at http://www.elcamino.edu/academics/slo/.

B. Course Student Learning Objectives (The major learning objective for students enrolled in this course are listed below, along with a representative assessment method for each)

1. Read and write integers and decimal numbers in standard, expanded, and verbal forms.
   
   Objective Exams

2. Perform basic operations (addition, subtraction, multiplication, division, and exponentiation) on real numbers, including reducing fractions to lowest terms.
   
   Written homework

3. Use the order of operations to evaluate expressions that combine the addition, subtraction, multiplication, division and exponentiation of real numbers.
   
   Written homework

4. Order a given set of real numbers.
   
   Objective Exams

5. Convert rational numbers into decimals, fractions and percentages.

Office Use Only: Course Identifier 19082
Objective Exams
6. Use the properties of the real numbers to evaluate, simplify, and factor algebraic expressions, including expressions with fractions and radicals.

Quizzes
7. Use rounding techniques to estimate results of operations on real numbers and determine the reasonableness of results.

Objective Exams
8. Formulate mathematical representations of real-world applications including the recognition of proportional relationships.

Written homework
9. Recognize and apply the concepts of variable, expression, equation and function.

Objective Exams
10. Find perimeters, areas, and volumes of various geometrical shapes and use in applications.

Objective Exams
11. Represent linear and quadratic models with tables, graphs and equations (coordinate graphing), and transform the model from one representation to another.

Written homework
12. Set up, graph, and solve linear equations, systems of linear equations, and linear inequalities using a variety of techniques.

Quizzes
13. Set up, graph and solve quadratic equations using a variety of methods, including factoring, the square root property, completing the square, and the quadratic formula.

Objective Exams
14. Set up and solve application problems using rational and radical equations.

Objective Exams
15. Demonstrate the use of multiple student success strategies.

Homework Problems
16. Create and use a multi-semester education plan, developed with assistance from a counselor.

Homework Problems
III. OUTLINE OF SUBJECT MATTER (Topics are detailed enough to enable a qualified instructor to determine the major areas that should be covered as well as ensure consistency from instructor to instructor and semester to semester.)

IV. PRIMARY METHOD OF EVALUATION AND SAMPLE ASSIGNMENTS

A. PRIMARY METHOD OF EVALUATION:

Problem solving demonstrations (computational or non-computational)

B. TYPICAL ASSIGNMENT USING PRIMARY METHOD OF EVALUATION:

A 13 foot ladder is placed against a building so that the distance from the top of the ladder to the ground is 7 feet more than the distance from the bottom of the ladder to the building. Set up and solve a quadratic equation to determine both the distance from the bottom of the ladder to the base of the building and the distance from the top of the ladder to the ground.

C. COLLEGE-LEVEL CRITICAL THINKING ASSIGNMENTS:

0. Selling Vehicles: A firm sells cars and trucks. There is room on its lot for 260 vehicles. They know that profits are greatest if there are 90 more cars than trucks on the lot. How many of each vehicle should the firm have on the lot for the greatest profit? Show enough work to support your answer.
1. Octane Ratings: The octane rating of a gasoline is a percent measure of the amount of iso-octane in the gas. How much 87-octane gas and 93-octane gas should be blended in order to make 12 gallons of 91-octane gas? Show enough work to support your answer.

D. OTHER TYPICAL ASSESSMENT AND EVALUATION METHODS:
   Performance exams
   Objective Exams
   Other exams
   Embedded questions
   Quizzes
   Homework Problems

V. INSTRUCTIONAL METHODS

   Group Activities
   Internet Presentation/Resources
   Laboratory
   Lecture

Note: In compliance with Board Policies 1600 and 3410, Title 5 California Code of Regulations, the Rehabilitation Act of 1973, and Sections 504 and 508 of the Americans with Disabilities Act, instruction delivery shall provide access, full inclusion, and effective communication for students with disabilities.

VI. WORK OUTSIDE OF CLASS

   Study
   Answer questions
   Skill practice
   Required reading
   Problem solving activities

Estimated Independent Study Hours per Week: 7

VII. TEXTS AND MATERIALS

A. UP-TO-DATE REPRESENTATIVE TEXTBOOKS

   Note: There is no textbook for this course. The above is simply an online resource used in the laboratory.

B. ALTERNATIVE TEXTBOOKS

C. REQUIRED SUPPLEMENTARY READINGS

D. OTHER REQUIRED MATERIALS

VIII. CONDITIONS OF ENROLLMENT

A. Requisites (Course and Non-Course Prerequisites and Corequisites)

<table>
<thead>
<tr>
<th>Requisites</th>
