# Proposal for Course Revisions Fall 2018

bject and Number: Mathematics 37
scriptive Title: Basic Algebra and Mathematics
urse Discipline(s): Mathematics
vision: Mathematical Sciences
partment: Mathematics
culty Proposer: Lars Kjeseth
vision CCC Rep: Diaa Eldanaf
vision Curriculum Committee Approval Date: 10/13/18
urse Review Rationale (The standard rationale verbiage is included. Add additional rationale information if eded): This course is being reviewed to meet Title 5 regulations and local standards. Add additional justification needed:
Inactivation stification: this course is being inactivated, stop here. No other parts of the form need to be complete.)
Course Name and Number  No changes  Revisions stification:
No Changes Revisions stification:
talog Description  No Changes  Revisions stification:
nditions of Enrollment  No Changes  Revisions (If prerequisite changes are being proposed, contact the Curriculum Advisor.)  stification:

II. Student Learning Outcomes (SLOs)  ☑ No Changes ☐ Revisions Justification:
III. Objectives  ☑ No Changes ☐ Revisions Justification:
IV. Major Topics  ☑ No Changes ☐ Revisions Justification:
V. Primary Methods of Evaluation  ☑ No Changes ☐ Revisions Justification:
VI. Instructional Methods  ☑ No Changes ☐ Revisions Justification:
VII. Work Outside of Class  ☑ No Changes ☐ Revisions Justification:
VIII. TEXTS AND MATERIALS  ☐ No Changes ☐ Revisions  Justification: A note was added explaining that there is no textbook for this course and that the "book" listed no more than set of online homework.

# IX. Distance Education Addendum

If a Distance Education Addendum exists for this course, you must complete the Distance Education Addendum below. Please refer to CurricUNET version if needed.

Distar	nce Education Version of this Course
Curre	nt version  Online  Hybrid
□ No	Changes
☐ Rev	visions
Justifi	cation:
Delive	ery Method:
☐ On	line (Complete Section A)
☐ Hyl	brid (Complete Section B)
	line (51% or more online instruction with an optional or mandatory on-campus orientation.) lete this section.

v.	Accommodations for Students with Disabilities and Instructional Delivery In compliance with ECC Board Policies 1600 and 3410, Title 5 California Code of Regulations, the Rehabilitation Act of 1973 – Sections 504 and 508, and the Americans with Disabilities Act, instructional delivery shall provide access, full inclusion, and effective communication for students with disabilities. Instructional delivery methods may include, but are not limited to, Braille/audiotape for print material, onsite interpreter/real-time transcription/live captioning for audio material, captioning for video material, alternative text for images, and captioning of audio information for electronic media materials (such as web and online)
	☐ Instructors of the distance education version of this course will read and will comply with the Accommodations for Students with Disabilities and Instructional Delivery.

#### Instructions:

To facilitate course review, please make your changes directly on this document and indicate the changes using strikethroughs (strikethroughs), highlights, or by changing the color of the font. Please do not use Track Changes.

# El Camino College COURSE OUTLINE OF RECORD - Pending

## I. GENERAL COURSE INFORMATION

**Subject and Number: Mathematics 37** 

Descriptive Title: Basic Algebra and Mathematics

Course Disciplines: Mathematics

Division: Mathematical Sciences

## **Catalog Description:**

This elementary algebra course provides students who place below the elementary algebra level the opportunity to develop numeracy skills, strengthen mathematical reasoning skills, and complete elementary algebra in a single semester. There are three levels of mathematics in this course, taught in an integrated fashion: basic arithmetic skills; fundamentals of algebra, with an emphasis on linear equations; and the remaining topics found in a typical elementary algebra course. This course has multiple exit levels, based on a student's demonstrated competencies. Students engage in student-success activities tailored specifically for mathematics courses.

Note: This course is not recommended for students who place at or above the elementary algebra level.

#### **Conditions of Enrollment:**

You have no defined requisites.

# **Course Length:**

X Full Term ☐Other (Specify number of weeks): Hours Lecture: 4.50 hours per week ☐TBA

Hours Laboratory: 3.50 hours per week TBA

Course Units: 5.00

**Grading Method: Pass / No Pass** 

**Credit Status: Associate Degree Credit** 

Transfer CSU: No

Transfer UC: No

General Education:			
El Camino College:			
CSU GE:			
IGETC:			

## **II. OUTCOMES AND OBJECTIVES**

A. COURSE STUDENT LEARNING OUTCOMES (The course student learning outcomes are listed below, along with a representative assessment method for each. Student learning outcomes are not subject to review, revision or approval by the College Curriculum Committee)

- 1. SLO #1 Application Problems: A student will be able to recognize the underlying mathematical concepts, with an emphasis on linear relations, in a given context (word problems, data, diagrams, etc.) and apply those concepts correctly.
- 2. SLO #2 Solving Equations and Manipulating Expressions: A student will be able to demonstrate the ability to identify and correctly implement techniques to symbolically solve equations, with an emphasis on linear equations, and manipulate expressions.
- 3. SLO #3 Visual and Graphical Methods: A student will be able to use visual and graphical methods to represent and analyze information and to solve problems, with an emphasis on linear graphs.
- 4. SLO #4 Articulating Mathematical Reasoning: A student will be able to articulate orally or in written form the mathematical reasoning they used to solve a problem or analyze a situation.

The above SLOs were the most recent available SLOs at the time of course review. For the most current SLO statements, visit the El Camino College SLO webpage at <a href="http://www.elcamino.edu/academics/slo/">http://www.elcamino.edu/academics/slo/</a>.

B. Course Student Learning Objectives (The major learning objective for students enrolled in this course are listed below, along with a representative assessment method for each)

1. Read and write integers and decimal numbers in standard, expanded, and verbal forms.

**Objective Exams** 

2. Perform basic operations (addition, subtraction, multiplication, division, and exponentiation) on real numbers, including reducing fractions to lowest terms.

Written homework

3. Use the order of operations to evaluate expressions that combine the addition, subtraction, multiplication, division and exponentiation of real numbers.

Written homework

4. Order a given set of real numbers.

**Objective Exams** 

5. Convert rational numbers into decimals, fractions and percentages.

Office Use Only: Course Identifier 19082

# **Objective Exams**

6. Use the properties of the real numbers to evaluate, simplify, and factor algebraic expressions, including expressions with fractions and radicals.

Quizzes

7. Use rounding techniques to estimate results of operations on real numbers and determine the reasonableness of results.

**Objective Exams** 

8. Formulate mathematical representations of real-world applications including the recognition of proportional relationships.

Written homework

9. Recognize and apply the concepts of variable, expression, equation and function.

**Objective Exams** 

10. Find perimeters, areas, and volumes of various geometrical shapes and use in applications.

**Objective Exams** 

11. Represent linear and quadratic models with tables, graphs and equations (coordinate graphing), and transform the model from one representation to another.

Written homework

12. Set up, graph, and solve linear equations, systems of linear equations, and linear inequalities using a variety of techniques.

Quizzes

13. Set up, graph and solve quadratic equations using a variety of methods, including factoring, the square root property, completing the square, and the quadratic formula.

**Objective Exams** 

14. Set up and solve application problems using rational and radical equations.

**Objective Exams** 

15. Demonstrate the use of multiple student success strategies.

**Homework Problems** 

16. Create and use a multi-semester education plan, developed with assistance from a counselor.

**Homework Problems** 

III. OUTLINE OF SUBJECT MATTER (Topics are detailed enough to enable a qualified instructor to determine the major areas that should be covered as well as ensure consistency from instructor to instructor and semester to semester.)

Lecture or Lab	Approximate Hours	Topic Number	Major Topic	
Lecture	24	I	<ul> <li>Level A Topics</li> <li>A. Basic Operations on Integers (Addition, Subtraction, Multiplication, Division, Exponentiation (whole number exponents), and the Order of Operations)</li> <li>B. Factors, Greatest Common Factors</li> <li>C. Multiples, Least Common Multiples</li> <li>D. Basic Operations on Fractions (Addition, Subtraction, Multiplication, Division, Exponentiation with whole number exponents, and the Order of Operations)</li> <li>E. Basic Operations on Decimal Numbers (Addition, Subtraction, Multiplication, Division, Exponentiation with whole number exponents, and the Order of Operations)</li> <li>F. Properties of Real Numbers</li> <li>G. Decimals, Fractions, and Percents</li> <li>H. Rates and Ratios</li> <li>I. Setting Up and Solving Percent Equations</li> <li>J. Perimeter, Area, and Volume</li> </ul>	
Lab	21	II	Level A Laboratory Topics  A. Basic Operations on Integers (Addition, Subtraction, Multiplication, Division, Exponentiation (whole number exponents), and the Order of Operations)  B. Factors, Greatest Common Factors  C. Multiples, Least Common Multiples  D. Basic Operations on Fractions (Addition, Subtraction, Multiplication, Division, Exponentiation with whole number exponents, and the Order of Operations)  E. Basic Operations on Decimal Numbers (Addition, Subtraction, Multiplication, Division, Exponentiation with whole number exponents, and the Order of Operations)  F. Properties of Real Numbers  G. Decimals, Fractions, and Percents  H. Rates and Ratios  I. Setting Up and Solving Percent Equations  J. Perimeter, Area, and Volume	
Lecture	24	III	Level B Topics  A. Variables and Linear Equations with Integer Coefficients B. Solving Linear Equations with Integer Coefficients C. Graphing Linear Equations with Integer Coefficients D. Variables and Linear Equations with Fractional and Decimal Coefficients	

	1	1	
			E. Solving Linear Equations with Fractional and Decimal Coefficients
			F. Graphing Linear Equations with Fractional and Decimal Coefficients

			I. Solving Systems of Linear Equations, Graphically,
			Numerically (using tables of values), and Symbolically
			(using substitution and elimination)  J. Evaluation Machines, Functions and Function Notation
			J. Evaluation Machines, Functions and Function Notation
Lecture	24	V	Level C Topics
			A. Factoring Quadratic Expressions
			B. Solving Quadratic Equations using Factoring     C. Dividing Polynomials
			D. Absolute Value Equations
			E. Solving Quadratic Equations using the Square Root
			Property
			F. Solving Quadratic Equations using Completing the
			Square G. Solving Quadratic Equations using the Quadratic
			Formula
			H. Graphing Quadratic Functions
			I. Rational Expressions and Equations
			J. Radical Expressions and Equations
Lab	21	VI	Level C Laboratory Topics
			A. Factoring Quadratic Expressions
			B. Solving Quadratic Equations using Factoring

Lecture	9	VII	<ul> <li>C. Dividing Polynomials</li> <li>D. Absolute Value Equations</li> <li>E. Solving Quadratic Equations using the Square Root Property</li> <li>F. Solving Quadratic Equations using Completing the Square</li> <li>G. Solving Quadratic Equations using the Quadratic Formula</li> <li>H. Graphing Quadratic Functions</li> <li>I. Rational Expressions and Equations</li> <li>J. Radical Expressions and Equations</li> <li>Mathematics-Tailored Affective Domain and Student Success Skills</li> <li>A. Creating a Growth Mindset and Self-Belief/Confidence in Mathematics</li> <li>B. Connecting Personal Passion and Long-term Goals with Mathematics Learning</li> <li>C. Setting Short-term Goals and Time Management in an Intense Mathematics Course</li> <li>D. Reducing Negative Struggles and Increasing Positive Struggles in Studying Mathematics</li> </ul>
Total Lecture Hours		81	
Total Laboratory Hours 63		63	
Total Hours 1		144	

## IV. PRIMARY METHOD OF EVALUATION AND SAMPLE ASSIGNMENTS

## A. PRIMARY METHOD OF EVALUATION:

Problem solving demonstrations (computational or non-computational)

## B. TYPICAL ASSIGNMENT USING PRIMARY METHOD OF EVALUATION:

A 13 foot ladder is placed against a building so that the distance from the top of the ladder to the ground is 7 feet more than the distance from the bottom of the ladder to the building. Set up and solve a quadratic equation to determine both the distance from the bottom of the ladder to the base of the building and the distance from the top of the ladder to the ground.

# C. COLLEGE-LEVEL CRITICAL THINKING ASSIGNMENTS:

Selling Vehicles: A firm sells cars and trucks. There is room on its lot for 260 vehicles. They
know that profits are greatest if there are 90 more cars than trucks on the lot. How many
of each vehicle should the firm have on the lot for the greatest profit? Show enough work
to support your answer.

1. Octane Ratings: The octane rating of a gasoline is a percent measure of the amount of isooctane in the gas. How much 87-octane gas and 93-octane gas should be blended in order to make 12 gallons of 91-octane gas? Show enough work to support your answer.

## D. OTHER TYPICAL ASSESSMENT AND EVALUATION METHODS:

Performance exams
Objective Exams
Other exams
Embedded questions
Quizzes
Homework Problems

#### V. INSTRUCTIONAL METHODS

Group Activities
Internet Presentation/Resources
Laboratory
Lecture

Note: In compliance with Board Policies 1600 and 3410, Title 5 California Code of Regulations, the Rehabilitation Act of 1973, and Sections 504 and 508 of the Americans with Disabilities Act, instruction delivery shall provide access, full inclusion, and effective communication for students with disabilities.

## VI. WORK OUTSIDE OF CLASS

Study
Answer questions
Skill practice
Required reading
Problem solving activities

**Estimated Independent Study Hours per Week: 7** 

#### **VII. TEXTS AND MATERIALS**

#### A. UP-TO-DATE REPRESENTATIVE TEXTBOOKS

John Squires and Karen Wyrick. <u>MyMathLab for Squires / Wyrick Developmental Mathematics Notebook</u>. 1st ed. Pearson, 2012.

Note: There is no textbook for this course. The above is simply an online resource used in the laboratory.

- B. **ALTERNATIVE TEXTBOOKS**
- C. REQUIRED SUPPLEMENTARY READINGS
- D. **OTHER REQUIRED MATERIALS**

#### **VIII. CONDITIONS OF ENROLLMENT**

A. Requisites (Course and Non-Course Prerequisites and Corequisites)

Requisites	Category and Justification

B. Requisite Skills

Requisite Skills		

C. Recommended Preparations (Course and Non-Course)

Recommended Preparation	Category and Justification

D. Recommended Skills

Recommended Skills

E. Enrollment Limitations

Enrollment Limitations and Category	Enrollment Limitations Impact
