Guests: none

**Curriculum for Fall 2012 Review**

- Geology 1, 2 and 4 are being completed from last semester.
- Anatomy & Physiology 34A and 34B, Physiology 31, Geography 2 and 5, Horticulture 55 and Physics 3A are all in Curricunet at Level 3. They need to be reviewed by DCC. This can be one on your own time.
- Horticulture 55, 60 and Physics 3B still need to be submitted. B. Carey will contact the reviewers.

**Curriculum for Spring 2013 Review**

- Courses for spring review have been determined: Biology 101, 102, 103, 17, Chemistry 4, Geology 30, 32, 34, 36, Physics 2A, 2B. Faculty members have been assigned to review and the CCC notified of our schedule.

**Repeatable Courses**

- Astronomy 13abc and Geography 20abcd are two repeatable courses in our division. Unless we can show these courses are required for transfer by one of the CSU or UC schools, they will need to be changed to non repeatable courses. J. Shankweiler and M. Ebiner will investigate the requirements at other schools and also check history on the names. If there are no conflicts, the courses will be Astronomy 13 and Geography 20 when converted to non-repeatable.

**Next Meeting**

The meeting on Friday, October 12 at 10:00am.
