correctly and the text has ample material on the SDLC, a higher success rate was expected on this question. The data suggests possible revision of the question or additional instruction concerning SDLC concepts.

Assessment Method Description:
Students are given a test consisting of true/false and multiple choice questions relating to the material covered in chapter 12 (Information Systems and Systems Development) of the course textbook.

Assessment Method:
Exam/Test/Quiz

Standard and Target for Success:
It is expected that the “correct” response percentage rate for all students on each question of the assessment will be 70% or higher. See below for rubric/definition of satisfactory.

Excellent: >= 90%
Good: >= 80% and < 90%
Satisfactory: >= 70% and < 80%
Unsatisfactory: >= 60% and < 70%
Failing: < 60%

Question 1:
19/371 0/371 40/371 53/371 85/371 197/371; 53.1%

Question 2:
224/371 93/371 17/371 8/371 0/371 342/371; 92.2%

Question 3:
238/371 93/371 9/371 4/371 0/371 344/371; 92.7%

Question 4:
176/371 106/371 45/371 0/371 0/371 327/371; 88.1%

Question 5:
200/371 83/371 34/371 11/371 0/371 328/371; 88.4%

Question 6:
53/371 53/371 81/371 17/371 46/371 250/371; 67.4%

Question 7:
40/371 67/371 50/371 74/371 32/371 263/371; 70.8%

Question 8:
38/371 10/371 41/371 22/371 79/371 190/371; 51.1%

Question 9:
27/371 70/371 62/371 84/371 21/371 264/371; 71.1%

Question 10:
144/371 59/371 79/371 29/371 3/371 314/371; 84.6%

The overall correct response rate for all students on all questions was 76.0%. Our target, however, was to have each individual question answered correctly by a minimum of 70% of the students assessed. Seven of the ten questions were answered satisfactorily or better (>= 70%), while the remaining three questions (questions 1, 6 and 8) were not.

10/01/2014 - A test question will be reworded to replace the acronym TPS with the words Transaction Processing System. Action Category: Teaching Strategies

03/03/2015 6:45 PM Generated by TracDat a product of Nuventive.
Assessment Method Description:

Students were given a test consisting of true/false and multiple choice questions relating to the material covered in SLO#2 of CIS-13. They were given a total of 10 questions:

**True/False**
1. TPS transactions are typically processed using batch processing.
2. In addition to the normal business transaction processing systems, there are also specialty transaction processing systems used by law enforcement, the military and other organizations.
3. The information that information systems provide is used to support a wide variety of business activities, from day-to-day transactions to long-term strategic planning.
4. Systems development is the process of analyzing a work environment, designing a new system or making modifications to the current system to fit the current needs of that work environment.

**Multiple Choice**
5. When computer systems perform in ways that would be considered intelligent if observed in humans, it is commonly referred to as _______.
6. Each phase of the _____ produces some type of documentation to pass on to the next phase.
7. ______ is the phase of system development in which the problem area is studied in depth and the needs of system users are assessed.
8. A(n) _____ is used to describe the characteristics of data used in a database or other type of computer system.
9. For the consumer products division, Acme Corporation is planning to replace the old system with a new one all at once. This is called a _____ conversion.
10. A(n) information system is a collection of elements that interact to generate information needed by the users in an organization. People are one of those elements. Which of the following is/are also an element that makes up an information system?

Lab 9: 17 students with 5 points, 0 students with less than 5 points, 100%
Lab 10: 16 students with 5 points, 1 student with less than 5 points, 94%
Lab 13B: 15 students with 5 points, 2 students with less than 5 points, 88%

Lab 13B – using the jQuery library and writing jQuery code. Though the students met the expected standard for lab 13B, this is a complex topic. jQuery is the primary programming language used in CIS136, and CIS133 is the pre-requisite course for CIS136. More time needs to be spent explaining it, and for the students to use it.

**Standard Met?**
Yes

**Semester and Year Assessment Conducted:**
2013-14 (Spring 2014)

**Faculty Assessment Leader:**
Monica Chaban

09/30/2014 - In order to properly prepare students for CIS136 less time could be devoted to the class project and more time allocated to jQuery. As practical experience is valuable when learning a new language, the better approach would be to remove jQuery from this class, and emphasize it more in CIS136. That would also eliminate the need to make CIS133 a pre-req for CIS136.

**Action Category:** Curriculum Changes

### Assessment Method Description:
A series of 8 lab assignments spread out through the semester, designed to test the students comprehension of the programming language and a demonstration of skill development

### Assessment Method:
Laboratory Project/Report

### Standard and Target for Success:
It is expected that 75% of the students will score 5 points on each of the 8 assignments

### Related Documents:

<tbody>
<tr>
<td>JS Handout 5 – popup windows and event listeners. Due to browser upgrades, the technique of using ‘event listeners’ changed from earlier browser releases, and what was described in the textbook was inaccurate. The differences were covered in lecture. A few students had trouble grasping the differences even though supplemental material was provided. JS Handout 10 - using the jQuery library and writing jQuery code was simplified from the previous semester, as jQuery a programming language unto itself, and it was shown that more time needs to be spent explaining it than is available in this class. The handout was included to give students a ‘taste’ of what can be done using jQuery.</td>
<td></td>
<td>05/15/2015 - Change Subject Matter Outline for the COR to remove emphasis on jQuery, and instead substitute in a more closely related topic, such as using JSON and RSS feed. These are more applicable to the Javascript/AJAX framework, and fit in better than jQuery. jQuery is a language unto itself and would be more properly taught in CIS136, where it is heavily used in the creation of mobile apps.</td>

<td>01/21/2015 - Extend the timeline for the curriculum to 16 weeks instead of 8 weeks to provide more time to absorb and digest this complex curriculum.</td>
</tr>
<tr>
<td></td>
<td><strong>Standard and Target for Success:</strong> It is expected that 75% of the students will score 70% or higher to meet standards set by Cisco.</td>
<td>Faculty Assessment Leader: D. Miller</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Assessment Method Description:</strong> Skills Based Assessment: To complete this assessment students must complete the following tasks: • Cable a network according to the topology diagram • Erase the startup configuration and reload a router to the default state • Perform basic configuration tasks on a router • Configure and activate interfaces • Configure VTP servers and client • Configure VLANs on the switches • Configure STP • Configure inter-VLAN routing</td>
<td>05/10/2014 - 11 of the 17 registered students completed the Skills Based Assessment successfully. The average was 65%. The above results indicate that students, who are engaged, study the curriculum and do the supplied lab activities will be able to successfully complete the Skills Based Assessment which requires a full understanding of the material that was presented during the course. The most important finding is that the level of engagement. Students, who are engaged, complete the course and perform well on the Skills Based Assessment. The challenge is gaining a higher degree of engagement. A course such as this requires a high degree of student interaction with the technology and that degree of interaction is difficult in an online class. The results indicates that an on-campus class format would provide a higher completion rate.</td>
<td>03/14/2015 - The results show that there is a very low retention rate in CIS-142. The low retention rate is typical for many online classes. But, the results also indicate that the enrolled students who took the Skills Based Assessment completed it successfully. This indicates that the Skills Based Assessment is a good representation of the SLO goals and skills attained during the course of the class. Therefore, the action is to change the class delivery from online to on-campus.</td>
</tr>

<td><strong>Standard and Target for Success:</strong> It is expected that 60% of enrolled students will complete the Skills Based Assessment.</td>
<td>03/03/2015 6:45 PM Generated by TracDat a product of Nuventive. Page 7 of 12</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Assessment Method Description:</strong> Skills Based Assessment: To complete this assessment students must complete the following tasks: • Cable a network according to the topology diagram • Erase the startup configuration and reload a router to the default state • Perform basic configuration tasks on a router • Configure and activate interfaces • Configure VTP servers and client • Configure VLANs on the switches • Configure STP • Configure inter-VLAN routing</td>
<td>05/10/2014 - 11 of the 17 registered students completed the Skills Based Assessment successfully. The average was 65%. The above results indicate that students, who are engaged, study the curriculum and do the supplied lab activities will be able to successfully complete the Skills Based Assessment which requires a full understanding of the material that was presented during the course. The most important finding is that the level of engagement. Students, who are engaged, complete the course and perform well on the Skills Based Assessment. The challenge is gaining a higher degree of engagement. A course such as this requires a high degree of student interaction with the technology and that degree of interaction is difficult in an online class. The results indicates that an on-campus class format would provide a higher completion rate.</td>
<td>03/14/2015 - The results show that there is a very low retention rate in CIS-142. The low retention rate is typical for many online classes. But, the results also indicate that the enrolled students who took the Skills Based Assessment completed it successfully. This indicates that the Skills Based Assessment is a good representation of the SLO goals and skills attained during the course of the class. Therefore, the action is to change the class delivery from online to on-campus.</td>

### Course SLO Assessment Cycle:
**2013-14 (Spring 2014)**

### Input Date:
11/12/2013

### Course SLO Status:
Active

---

**Assessment Method & Standard and Target for Success / Tasks**

- **Assessment Method:** Laboratory Project/Report
- **Standard and Target for Success:**
  - It is expected that 70% of students will score 70% or above on this SLO.

---

**Internet from its original text-based web sites to current and collaborative interactive web sites.**

#### Assessment Method Description:

- Students are given an assignment to create an invoice form that includes labels (to be formatted in specific patterns) and formulas (to be accurately constructed). Critical thinking is assessed in formulas in which students must determine which values are required (and which values must be omitted) in order to arrive at the correct answer.

#### Assessment Method:
Laboratory Project/Report

#### Standard and Target for Success:
Based on percentages, it is expected that 60% (or more) of the class will complete the assignment.

**Related Documents:**
CIS 26 SLO1 ATTACHMENT 5-15-14.xlsx

---

**Results**

- 9 students (36% students) got between 90% and 100%.
- 9 students (36% students) got between 80% and 89%.
- 4 students (16% students) got between 70% and 79%.
- 3 students (12% students) got between 60% and 69%.
- 0 students (0% students) got between 0% and 59%.

Overall, 22 students (88% students) got 70% or above on this SLO.

**Standard Met? :** Yes

**Semester and Year Assessment Conducted:**
2013-14 (Spring 2014)

**Faculty Assessment Leader:**
J. Siddiqui

---

**Action & Follow-Up**

09/30/2014 - Since 100% of the class was successful in the assessment, a more rigorous assignment with more formulas will be constructed.

**Action Category:**
SLO/PLO Assessment Process

---

**ECC: CIS 26 - Using Microsoft Excel - SLO #1 Spreadsheets - Given an in-class assignment, construct an accurate and complete spreadsheet that demonstrates appropriate formatting and fundamental math calculations.**

#### Assessment Method Description:

- Students are given an assignment to create an invoice form that includes labels (to be formatted in specific patterns) and formulas (to be accurately constructed). Critical thinking is assessed in formulas in which students must determine which values are required (and which values must be omitted) in order to arrive at the correct answer.

#### Assessment Method:
Laboratory Project/Report

#### Standard and Target for Success:
Based on percentages, it is expected that 60% (or more) of the class will complete the assignment.

**Related Documents:**

**Results**

#### Assessment Method Description:

- Students are given an assignment to create an invoice form that includes labels (to be formatted in specific patterns) and formulas (to be accurately constructed). Critical thinking is assessed in formulas in which students must determine which values are required (and which values must be omitted) in order to arrive at the correct answer.

#### Assessment Method:
Laboratory Project/Report

#### Standard and Target for Success:
Based on percentages, it is expected that 60% (or more) of the class will complete the assignment.

**Results**

- 02/06/2014 - 100% of the class (23 out of 23 students) completed the assignment.
- 09/09/2014 - 78% of the class (14 out of 18 students) completed the assignment.
- 09/09/2014 - 78% of the class (14 out of 18 students) completed the assignment.
- 02/05/2015 - In Spring 2014 100% of the students completed the objective successfully, so this Plan was proposed as an SLO Assessment Process in the Action Category column:
  - Since 100% of the class was successful in the assessment, a more rigorous assignment with more formulas will be constructed.
  - Accordingly, an exercise to place controls on the invoice sheet used in this exercise was added to the assignment (see dotted-rectangle area on the attached assignment).
### ECC: CIS 28 - Database Management using Microsoft Access - SLO #1 Concepts and Terms
- Understand database concepts and terminology.

#### Course SLO Assessment Cycle:
- 2013-14 (Spring 2014)
- 2015-16 (Spring 2016)

#### Input Date:
- 11/12/2013

#### Course SLO Status:
- Active

#### Assessment Method Description:
At the end of the semester students will be given a test consisting of true/false and multiple choice questions that cover database concepts and terminology covered during the semester.

#### Standard and Target for Success:
- It is expected that a minimum of 75% of the students will score at least satisfactorily (70% or higher) on this SLO. See below for rubric/definition of satisfactory.

<table>

  - 2013-14 (Spring 2014)

  **Faculty Assessment Leader:**
  - Randy Harris

#### Action Category:
- Teaching Strategies

---

#### Additional Information:
- 01/27/2015 - This addition to the assignment did achieve the desired purpose of making the assignment more rigorous; 78% of the class completed the assignment, compared to 100% in the prior semester. On-sheet controls are not a skill covered in depth in this CIS26 course, so the purpose of using them early in the semester (when this SLO is assessed) served to place a control element on the worksheet which would be used by the students in subsequent exercises.

- 04/15/2015 - Additional reinforcement of key database concepts and terminology

- 05/15/2015 - Additional reinforcement of key database concepts and terminology

- 02/09/2015 - Student scores are satisfactory once again for this SLO. Additional coverage will hopefully bring the class average even higher.

- 12/04/2014 - Spend additional time throughout the semester reinforcing basic terminology and concepts.

---

**Follow-Up:**

01/27/2015 - This addition to the assignment did achieve the desired purpose of making the assignment more rigorous; 78% of the class completed the assignment, compared to 100% in the prior semester. - 2016-17 (Spring 2017)

**Input Date:** 11/12/2013

**Course SLO Status:** Active
Course SLOs Assessment Cycle:
#2 Mobile - Compare and contrast various mobile technologies that are currently being used to conduct online business.

**Input Date:**
11/12/2013

**Course SLO Status:**
Active

### Assessment Method Description:
Multiple Lab Assignments throughout the semester to assess various Mobile Technologies and provide comparisons.

### Assessment Method:
Laboratory Project/Report

### Standard and Target for Success:
It is expected that 70% of students will score 70% or above on this SLO.

#### Results
05/05/2014 - A total of 20 students took this assessment.

- 8 students (40% students) got between 90% and 100%.
- 7 students (35% students) got between 80% and 89%.
- 2 students (10% students) got between 70% and 79%.
- 3 students (15% students) got between 60% and 69%.
- 0 students (0% students) got between 0% and 59%.

Overall, 17 students (85% students) got 70% or above on this SLO.

### Standard Met?:
Yes

### Faculty Assessment Leader:
J. Siddiqui

### Action & Follow-Up
09/30/2014 - While students understand and relate to the various Mobile Technologies, they had difficulty in comparing and contrasting them. They need to be further explained the difference between just explaining the various Mobile Technologies and providing a contrast and comparison, and their analytical skills need to be developed further by spending additional time in this area.

Course SLOs Assessment Cycle:
#3 Software - Understand the basic and advanced functions of eCommerce software.

**Input Date:**
11/12/2013

**Course SLO Status:**
Active

### Assessment Method Description:
Multiple Lab Assignments to test the understanding of the basic functions of eCommerce Software, followed by Lab Reports on advanced functions of eCommerce Software. Laboratory Project/Report

### Standard and Target for Success:
It is expected that 70% of students will score 70% or above on this SLO.

#### Results
05/07/2014 - A total of 20 students took this assessment.

- 6 students (40% students) got between 90% and 100%.
- 8 students (35% students) got between 80% and 89%.
- 4 students (10% students) got between 70% and 79%.
- 2 students (10% students) got between 60% and 69%.
- 0 students (0% students) got between 0% and 59%.

Overall, 18 students (90% students) got 70% or above on this SLO.

### Standard Met?:
Yes

### Faculty Assessment Leader:
J. Siddiqui

### Action & Follow-Up
09/30/2014 - Students had difficulty in comprehending the advanced functions of eCommerce software. While this could be attributed to difficulty in comprehending advanced technology, additional time also needs to be spent on the basic functions so that students are able to make a seamless mental transition from basic to advanced while building a strong foundation.
