## **El Camino College MESA Program Secures Grants to Support Student Achievement**

El Camino College's MESA (Mathematics, Engineering, Science Achievement) Program recently secured a \$10,000 grant this summer from Northrop Grumman Corporation to increase the number of computers available to students in the campus MESA Center.

The grant follows another \$10,000 grant awarded to MESA in the spring from the El Camino College Foundation. These funds were used to renovate the MESA Center, a place where students can do homework, study, and use computers.

Before the grants, the center only had six computers available for student use (one was only used for printing). These grant awards will significantly increase the resources available for student academic success in the MESA Center, which during the fall and spring terms, serves more than 80 math and science students daily.
