ECC Women in Industry & Technology Program Offers Open House

The El Camino College Women in Industry & Technology (WIT) Program will sponsor an open house with the Career & Technical Education and Career Placement Services departments. The event is scheduled from noon to 2 p.m. Oct. 26 in Student Services Building, Room 204G.

Participants will learn about the WIT Program and the Career & Technical Education and Career Placement Services centers, in addition to having an opportunity to network with faculty, staff and students.

The WIT program at El Camino College offers support for women who want to go into non-traditional careers by providing a forum for guest speakers, lectures, field trips and tours. Participants view non-traditional employment from a practical, hands-on, interactive stance. Counseling, peer support group, tutoring and child care are available, as is assistance with employment, internships, and apprenticeships.

For more information, contact the WIT Center at 310-660-6780.
