El Camino College Child Development Center Open for New Students

The El Camino College Child Development Center (CDC) currently has openings in its preschool program and is now accepting new students for the outstanding, fully accredited preschool program. A choice of two programs is available: a state preschool program and a full-day, fee-based program. Children must be at least 2 years old and completely toilet trained.

All teachers at the CDC are state-certified, and curriculum is developmental in nature. We provide a high-quality program within a nurturing environment. Preparing children to meet the challenges of kindergarten is a goal of the program, focusing on a developmental curriculum which prepares the child cognitively, socially, emotionally, physically and linguistically.

The CDC is accredited by the National Association for the Education of Young Children (NAEYC). Stipends are provided for qualifying student parents who attend El Camino College.

For more information about the CDC, call the preschool school office at 310-660-3720.
