

## ACADEMIC EXCELLENCE WORKSHOPS

Academic Excellence Workshops parallel your math and science courses and are led by a peer facilitator. Worksheets and activities will be developed by the facilitator to provide additional examples of course content. All work that is presented by the peer facilitator is designed to be completed during the workshop; no additional homework will be given.

### WORKSHOPS ARE OPEN TO ALL STUDENTS.

*If you are interested in attending any of the workshops listed below, just show up at the designated room and time*
