The following requirements for the major are subject to change without notice. To assure that this information is current, you should consult with a Chemistry counselor, or review articulation agreements via the Internet at www.assist.org

NOTE: The BS Degree is typically more science subject intensive. The BA Degree may be more cross-disciplinary and allow for more elective choices/flexibility.

NOTE: Students who have a strong chemistry background, or have taken high school chemistry may take the chemistry placement exam to waive Chemistry 4, Beginning Chemistry. Although organic chemistry is generally an upper division course, some universities allow students to take it at a community college. Our Chemistry 7A, 7B is transferable, but the university may require a proficiency examination and additional upper division chemistry units.
