

COMPUTER SCIENCE MAJOR

Transfer Requirements

CAREER OPPORTUNITIES: Computer Science is a rapidly changing field and one that has demand for highly trained professionals. An option within the Engineering Major focuses on the construction and design of a computer's electrical components, compilers and operating systems, and information transmission reliability. Within the Mathematics Major, a focus on computer science emphasizes artificial intelligence, computer graphics, database management systems, language and computation.

NOTE: Many programs are impacted, requiring high GPA and screening of prerequisites. Due to the competitive nature of the Computer Science major, students are advised to complete as many courses required for the major prior to transfer. *Computer Science 3 & 10 are offered in the fall semester only; Computer Science 30 & Math 210 are offered in the spring semester only.

ECC's Computer Science 2 and 30 articulates as Berkeley's Computer Science 61B (students must complete COMPSCI 47B at UCB to complete the requirement). With few exceptions, transfer students must take CS 61A and 61C during their first semester(s) at Berkeley. The entire CS 61 series is also offered during the Berkeley summer session. The dept. recommends that students take these courses during the summer sessions prior to transfer.
