

SINGLE SUBJECT TEACHING CREDENTIAL

Transfer Requirements

The Single Subject teaching credential authorizes the holder to teach an individual subject in grades six through twelve. In order to obtain a Single Subject teaching credential, students must possess a Bachelor of Arts degree, satisfy the state's basic skills requirement, and demonstrate subject matter competence, either by completing a California Commission on Teacher Credentialing (CCTC) approved subject matter preparation program or by passing the California Subject Exam for Teachers (CSET) in the field they wish to teach. Although Single Subject credential candidates can major in any subject, it is recommended that they major in a subject closest to the field in which they plan to teach. Subject matter programs generally coincide sufficiently with the degree major so that many of the same courses can be used to complete both major and subject matter program requirements, but students should be aware that satisfying the requirements for one does not automatically satisfy the requirements for the other.

Students interested in earning a Single Subject credential through a California State University should complete the following prior to transfer: (1) the CSU General Education certification pattern; (2) any lower division courses for the major that are offered at El Camino College; (3) any prerequisites to upper division courses in the major that are available at El Camino; and (4) the Subject Matter Preparation Program courses listed on this guide sheet if they have not already been taken as part of the major. Note: Lower division courses for the major can be found in each university's catalog and/or at www.assist.org, and prerequisites for upper division courses in the major can be found in each institution's catalog.
