STEM talk for El Camino College students
brought to us by math Prof. Jasmine Ng

Date: Wed., Feb. 17
Time: 4-5 p.m.
Place: Alondra Room

Title: A Tale of Two Engineers

Description

Two civil engineers taking different paths in their careers after college. Robert attended graduate school at UC Berkeley and now works in the private sector. Ron started working in the public sector and attended graduate school while working full-time.

During this talk, Robert and Ron will each speak about a project that they contributed to at work. A panel discussion in which Robert and Ron will answer questions about their academic and career paths will follow. Audience members are encouraged to ask questions during the panel discussion.

Biographies

Ron Matsuoka, P.E., received his M.A. in Public Administration from CSUN and his B.S. in Civil Engineering from UCLA. He is an Associate Civil Engineer in the Traffic & Lighting Division for the County of Los Angeles Department of Public Works. Outside of work, Ron enjoys traveling the world, watching movies, and being a foodie.

Dr. Robert Campbell received his Ph.D. in Civil and Environmental Engineering (Transportation) from UC Berkeley and his Bachelor's degree in the same field from UCLA. He now works as an analyst for the transportation consulting firm Cambridge Systematics, where his clients include LA Metro, Caltrans, the Federal Highway Administration, and USDOT. He enjoys driving so much (and likes LA so much) that while he was a student at UC Berkeley, he drove back down here from the Bay Area each weekend—for four years.
