CALIFORNIA COMMUNITY COLLEGES
AND
LOS RIOS
COMMUNITY COLLEGE DISTRICT

#86-37
Los Rios will provide a Student Outcome Study to establish a model which can be used to evaluate student learner outcomes. The study will evaluate the effectiveness of basic skills instruction in 30 colleges that are a representative sample of California Community Colleges. These colleges will complete the study design which include three major components: evaluation of skills acquisition (pre-/post-testing, evaluation of student goal completion, and tracking students for successful completion and articulation.)
