**PROPOSAL DESCRIPTION**

This proposal is a grant request. Southwestern College (SWC) is proposing to develop and implement a special curriculum and instructional support program for underrepresented students who wish to gain entry into the Nursing program. The project meets the Governing Board's basic agenda for fostering diversity and economic development by increasing the number of underrepresented students in a vocational program in Nursing.

The immediate impact of the project will be to recruit and prepare underrepresented students for the Nursing program, the longer term impact will be the implementation of changes in the recruitment and instructional strategies that will be pursued by SWC to ensure that such students gain equitable preparation and entry for this career. Results of the project will be disseminated to all instructional divisions within SWC and publicized to other colleges by the staff.
