# EL CAMINO COLLEGE COURSE OUTLINE OF RECORD - Approved

| Subject:                        | BIOL  |
|---------------------------------|---|
| Course Number:                  | 120H  |
| Descriptive Title:              | Honors Ecology, Evolution, Diversity, and Physiology  |
| Division:                       | Natural Sciences  |
| Department:                     | Biology   |
| Course Disciplines:             | Biological Sciences   |
| Catalog Description:            | This honors course, intended for students in the Honors Transfer Program, is<br>a survey of eukaryotic organisms, their evolution and ecology. The student<br>will have a thorough exposure to plant and animal anatomy and physiology,<br>and will utilize animal dissection in the lab. Students will be expected to<br>complete a project that includes hypothesis, prediction, experimentation, and<br>presentation of results. This course is one of three courses in the biology<br>series designed for biology majors, including those students planning to<br>pursue a career in medicine, dentistry, or other life sciences. This course is<br>enriched through extensive rigorous reading, writing, and research<br>assignments.<br>Note: Students may take either Biology 120 or Biology 120H. Duplicate credit<br>will not be awarded for Biology 120 and Biology 120H. |
| Prerequisite:                   | Chemistry 4 or Chemistry 4H with a minimum grade of C in prerequisite or equivalent   |
|                                 | Biology 110 or Biology 110H and English 1 or eligibility for English 1A or qualification by appropriate assessment.   |
| Course Length:                  | Full Term   |
| Hours Lecture (per<br>week):    | 3   |
| Hours Laboratory (per<br>week): | 6   |
| <b>Outside Study Hours:</b>     | 6   |
| Total Course Hours:             | 162   |
| Course Units:                   | 5   |
| Grading Method:                 | Letter Grade only   |
| Credit Status:                  | Credit, degree applicable   |
| Transfer CSU:                   | Yes   |
| Effective Date:                 | 12/19/2016  |
| Transfer UC:                    | Yes   |
| Effective Date:                 |   |
| General Education:<br>ECC       | Area 1 - Natural Sciences   |
| Term:                           |   |
| Other:                          |   |

| <ul> <li>observe cells and microorganisms.</li> <li>SLO #3 Content Knowledge (Energy Flow)<br/>Students will use basic energy principles to explain the flow of energy in<br/>systems, such as those that occur in the cellular metabolic pathways of<br/>photosynthesis and cell respiration, or the relationships observed betwe<br/>autotrophs and heterotrophs in ecosystems.</li> <li>Characterize interactions among organisms and between organis<br/>and environment.</li> <li>Discriminate among population dynamics, community structure<br/>ecosystem functions.</li> <li>Outline major events in the evolutionary history of life.</li> <li>Explain the principles and mechanisms of evolution at the micro<br/>macro levels.</li> <li>Compare and contrast representative phyla of supergroups of<br/>Eukarya (formerly protists).</li> <li>Recognize the various protist, fungal, plant, and animal phyla vie<br/>in the lab.</li> <li>Compare and contrast the life cycles of the fungal divisions.</li> <li>Diagram and explain the alternation of generations in the life cyc<br/>plants.</li> <li>Identify samples of flower, fruit, and seed types.</li> <li>Describe the various plant tissues and organs.</li> <li>Explain water and food transport in plants.</li> <li>Discuss the role of phytohormones in plant growth.</li> </ul>  |                    | 2. Nitrogen Cycle   |
|---|--------------------|---|
| Term:         Other:         IGETC:       Area 5B - Biological Science, Area 5C - course that incorporate a laborato         Term:       Other:         Student Learning       SLO #1 Scientific Method         Outcomes:       The student will understand and apply principles of the scientific method recognizing an idea based on reproducible evidence.         SLO #2 Use of Microscope       The student will be able to use the compound and dissecting microscope observe cells and microorganisms.         SLO #3 Content Knowledge (Energy Flow)       Students will use basic energy principles to explain the flow of energy in systems, such as those that occur in the cellular metabolic pathways of photosynthesis and cell respiration, or the relationships observed betwe autotrophs and heterotrophs in ecosystems.         Course Objectives:       1. Characterize interactions among organisms and between organis and environment.         2. Discriminate among population dynamics, community structure ecosystem functions.       3. Outline major events in the evolutionary history of life.         4. Explain the principles and mechanisms of evolution at the micro macro levels.       5. Compare and contrast representative phyla of supergroups of Eukarya (formerly protists).         6. Recognize the various protist, fungal, plant, and animal phyla vie in the lab.       7. Compare and contrast the life cycles of the fungal divisions.         3. Diagram and explain the alternation of generations in the life cycle plants.       9. Identify samples of flower, fruit, and seed types.                                       |                    |   |
| Term:         Other:         IGETC:       Area 5B - Biological Science, Area 5C - course that incorporate a laborato         Term:       Other:         Student Learning       SLO #1 Scientific Method         Outcomes:       The student will understand and apply principles of the scientific method recognizing an idea based on reproducible evidence.         SLO #2 Use of Microscope       The student will be able to use the compound and dissecting microscope observe cells and microorganisms.         SLO #3 Content Knowledge (Energy Flow)       Students will use basic energy principles to explain the flow of energy in systems, such as those that occur in the cellular metabolic pathways of photosynthesis and cell respiration, or the relationships observed betwe autotrophs and heterotrophs in ecosystems.         Course Objectives:       1. Characterize interactions among organisms and between organis and environment.         2. Discriminate among population dynamics, community structure ecosystem functions.       3. Outline major events in the evolutionary history of life.         4. Explain the principles and mechanisms of evolution at the micro macro levels.       5. Compare and contrast representative phyla of supergroups of Eukarya (formerly protists).         6. Recognize the various protist, fungal, plant, and animal phyla vie in the lab.       7. Compare and contrast the life cycles of the fungal divisions.         9. Identify samples of flower, fruit, and seed types.       10. Describe the various protist, fungal, plant, and animal phyla vie in the lab. <tr< th=""><th></th><th></th></tr<> |                    |   |
| Term:         Other:         IGETC:       Area 5B - Biological Science, Area 5C - course that incorporate a laborato         Term:       Other:         Student Learning       SLO #1 Scientific Method         Outcomes:       The student will understand and apply principles of the scientific method recognizing an idea based on reproducible evidence.         SLO #2 Use of Microscope       The student will be able to use the compound and dissecting microscope observe cells and microorganisms.         SLO #3 Content Knowledge [Energy Flow)       Students will use basic energy principles to explain the flow of energy in systems, such as those that occur in the cellular metabolic pathways of photosynthesis and cell respiration, or the relationships observed betwe autotrophs and heterotrophs in ecosystems.         Course Objectives:       1. Characterize interactions among organisms and between organis and environment.         2. Discriminate among population dynamics, community structure ecosystem functions.       3. Outline major events in the evolutionary history of life.         4. Explain the principles and mechanisms of evolution at the micro macro levels.       5. Compare and contrast representative phyla of supergroups of Eukarya (formerly protists).         6. Recognize the various protist, fungal, plant, and animal phyla vie in the lab.       7. Compare and contrast the life cycles of the fungal divisions.         8. Diagram and explain the alternation of generations in the life cycles of phytohormones in plant growth.       1. Explain water and food transport in plants.                   |                    |   |
| Term:         Other:         IGETC:       Area 5B - Biological Science, Area 5C - course that incorporate a laborato         Term:       Other:         Student Learning       SLO #1 Scientific Method         Outcomes:       The student will understand and apply principles of the scientific method recognizing an idea based on reproducible evidence. - 3. Water Cycle
- 4. Other nutrients
- C. Biomes
- D. Pollution

## III. "Protists" (4 hours, lecture)

- A. Supergroups within Eukarya
  - 1. Diplomonads
  - 2. Archaeplastida
  - 3. Ophistokonta

#### IV. Fungi (4 hours, lecture)

- A. Evolution
- B. Ecological variances
- C. Life cycles
- D. Spore types
- E. Reproduction

### V. Plants (14 hours, lecture)

- A. Non-vascular and Seedless Plants
  - 1. Liverworts
  - 2. Hornworts
  - 3. Mosses
- B. Vascular Seedless Plants
  - 1. Selaginella, Quillworts, and other Lycopods
  - 2. Ferns and Their Allies
- C. Seed Plant Diversity, Ecology, and Reproduction
  - 1. Cycadophyta
  - 2. Gingkophyta
  - 3. Pinophyta
  - 4. Gnetophyta
  - 5. Anthophyta (Angiosperms)
- D. Angiosperm Anatomy
- E. Angiosperm Physiology

#### VI. Animals (16 hours, lecture)

- A. Animal Tissues
  - 1. Ectoderm
  - 2. Mesoderm
  - 3. Endoderm
- B. Animal Organ Systems
  - 1. Skin/Integument
  - 2. Cardiovascular
  - 3. Respiratory
  - 4. Skeletal
  - 5. Reproductive
  - 6. Excretory
  - 7. Digestive
  - 8. Endocrine
  - 9. Muscle
  - 10. Nervous

# A minimum of 80% of lab activities are hands-on experiences VII. Microscope (4 hours, lab)

- A. Compound Microscope
  - 1. Letter "e"
  - 2. Silk fiber Slide
- B. Dissecting Microscope

#### VIII. Research Methods (8 hours, lab)

- A. Strategy
- B. Research Projects
- C. Data
- D. Preliminary Reports
- E. Group Projects

#### IX. Ecology (14 hours, lab)

#### X. Protists and Supergroups (7 hours, lab)

- A. Diplomonads
- B. Alveolata
- C. Ciliata
- D. Amoebozoa
- E. Archaeplastida
- F. Opisthokonta

#### XI. Fungi (7 hours, lab)

- A. Ascomycota
- B. Zygomycota
- C. Chytridiomycota
- D. Glomeromycota
- E. Basidiomycota
- F. Lichens
- G. Mycorrhizal Assemblages

#### XII. Plants (28 hours, lab)

- A. Seed Plants
- B. Plant anatomy
- C. Plant physiology
- D. Plant hormones
- E. Stimuli response
- F. Phytochemistry

#### XIII. Animals (40 hours, lab)

- A. Diversity of phyla and diplobastic or triploblastic tissue types.
- B. Phylum overview (9 -15 phyla)
- C. Phylum Porifera
- D. Phylum Cnidaria
- E. Phylum Platyhelminthes
- F. Phylum Nematoda
- G. Phylum Annelida
- H. Phylum Mollusca
- I. Phylum Arthropoda

|  | J. Phylum Echinodermata   |
|--|---|
|  | K. PhylumHemichordata   |
| Tabal Lasterna II.                     | L. Phylum Chordata  |
