

BLS CPR PIT CREW

P3: Position 3 always at patient's Head

- Opens and clears airway; inserts adjunct
- Assembles/applies BVM, suction, O₂
- Provides 2-hand BVM mask seal
- Inserts King airway when appropriate

P2: Position 2 always on patient's Left side

- Brings and operates AED
- Alternates compressions with P1
- Ventilates in off cycle
- Assists with King airway prep, if needed
- *Either P1 or P2 may move to P4 when more rescuers arrive*

P1: Position 1 always on patient's Right side

- Initiates compressions until AED first analysis, then alternates with P2
- Ventilates in off cycle
- King Airway prep in off cycle
- *Either P1 or P2 may move to P4 when more rescuers arrive*

P4: Position 4 outside the CPR triangle, by the legs until ALS comes

- Code Commander/Team Leader
- Makes all treatment decisions
- Ensures high-quality CPR
- Question bystanders/handle scene control
- Interface/hand-off with ALS

Advanced providers
can come in and deliver
meds [P5] and operate
a cardiac monitor [P6]
by/from the legs,
outside the CPR triangle
