

SLO ADVISORY COMMITTEE

September 17, 2012

1:00pm – 1:50pm

LS 101

Attendees: Amy Grant, Jean Shankweiler, Nancy Freeman, Margaret Steinberg, Jim Noyes and Vincent Lloyd.

1. Division Reports

Astronomy was submitted Summer 2012, Jim will check to be sure the reports are in the system. Biology will be submitting data collected in Spring 2012. Geography was submitted. Geology and Oceanography are waiting for data. Amy will submit all levels of Chemistry, these are being assessed in fall and will be due in spring (she needs permissions). Life Sciences are having problems with CurricUNET. The data is now in a document. The faculty will meet with Jim. Physics will be assessing in the fall since Susana was on sabbatical in spring.

2. Problems with submissions

- a) Software problems—submissions from spring are due October 5.
- b) Jean Bellemin will submit Biology 18, there are software issues Jim contacted Kaysa and should get the issues resolved.
- c) Zoology missed the assessment in spring and so will fill the gap next spring when it is taught again. We will need to do two assessments for that course.

3. Concerns/Other

- d) Compton should be included when developing statements, but they can be assessed independently.
- e) Nancy is the only a full time instructor teaching Biology 10. What about part time instructors, do they need to assess. Jim's reply is that, yes, they should at least assess and send you data to analyze.
