

# CHIROPRACTIC COLLEGES

The following requirements are subject to change without notice. To assure accuracy of the information on this sheet, consult with a counselor for additional information.

Chiropractors diagnose and treat spinal and other health disorders to help patients regain and maintain good health. They work to prevent disability and to correct abnormalities caused by interference with the nervous system. They manually adjust the spinal column and other parts of the body. They may use water, light, heat, ultrasound, nutritional, and electric therapy.
