

ACCELERATED DEGREE PROGRAMS

Fast paced, comprehensive, accredited degree programs are offered by the following universities at many local off campus sites. These programs, leading to a bachelor's degree or a master's degree are educational alternatives for adult learners. They are designed especially for adults whose geographic locations, financial situations, family responsibilities or employment demands limit access to traditional programs. These programs provide flexible, individualized curriculums. Often they do not follow a traditional academic calendar. Some award college credit based on students' professional/life experiences. Lower division requirements vary with each institution. More information on these programs is available in the Transfer Center.
