INTRODUCTION TO THE SOCIAL SCIENCES

This course introduces students to the fields of study that comprise the social sciences and their interrelationship. Students will be introduced to the basic theories and methods of social science disciplines and how their contributions facilitate our understanding of the social and cultural worlds humans inhabit and the problems experienced by contemporary societies. This course also exposes students to the concepts and techniques that are used in social science research and in career choices available to students pursuing a degree in the social sciences.

Course Highlights:

- Built in Academic Counselor
- Start an Education Plan
- Explore Social Science Majors
- Self-Reflection/Self-Awareness Activities
- Career Exploration and Planning
- Learn about the Transfer Process
- Examination of Contemporary Topics
- PASS (Peer Assisted Support Session) Mentor
- Zero Cost Textbook
